Correction: The effect of non-verbal music on anxiety in hospitalized children

Ashrafalsadat Hakim^{1*}, Seyedeh Shima Hosseini Kaldozki², Ashraf Tashakori³ and Saeed Ghanbari⁴

Correction: *BMC Pediatr* 23, 279 (2023)

<https://doi.org/10.1186/s12887-023-04101-2>

Published online: 22 June 2023

Following publication of the original article [1], the authors identified errors in the caption of Tables 1 and 2, and in reference citations in page 4 of the published version. The correct Tables 2 and 3 caption, and reference citations are given below.

- Correct Tables 2 and 3 captions:
 - Table 2: The effect of non-verbal music on the level of anxiety of hospitalized children.
 - Table 3: The effect of non-verbal music on vital signs of hospitalized children.
- Correct reference citations:
 - A direct relationship between anxiety levels and vital signs such as systolic blood pressure, heart rate, and respiratory rate has been reported in various studies [14, 24–26].

The original article has been corrected.
