Erratum to: Safety and tolerability of Bifidobacterium longum subspecies infantis EVC001 supplementation in healthy term breastfed infants: a phase I clinical trial

Jennifer T. Smilowitz^{1,2*}, Jackelyn Moya¹, Melissa A. Breck¹, Chelsea Cook¹, Annette Fineberg³, Kathleen Angkustsiri⁴ and Mark A. Underwood⁵

Erratum

Following the publication of this article [1], it was brought to our attention that the lower SD bars in Fig. 3a were unfortunately omitted. Furthermore, the bar graphs were erroneously referred to as “dot plots” in the figure legend. The correct Fig. 3a is presented below:

Fig. 3 Infant stool consistency. **a** Mean + SD of the proportion in reported infant stool consistency for the LS (red bar) and BiLS (blue bar) groups during the Baseline, Intervention, and Post-intervention periods. $n = 34$ for each group during the Baseline and Intervention periods, $n = 33$ for the LS group, and $n = 34$ for the BiLS group during the Post-intervention period

The above have been updated in the original version of the article.
